SolveIT Software Expands Head Office Operation

ADELAIDE, SOUTH AUSTRALIA, 30 November 2009 – SolveIT Software Pty Ltd, a leading provider of enterprise software for supply & demand optimisation and predictive modelling, announced today that due to significant company growth during the past year, SolveIT Software has moved its head office to a new, substantially larger facility at Level 1, 99 Frome Street in Adelaide's central business district.

SolveIT Software's applications for supply & demand optimisation have been in high demand during the economic downturn, largely due to their ability to reduce costs, boost productivity and efficiency, and give organisations a competitive advantage. The company has moved to the new facility at 99 Frome Street to accommodate its expanding staff.

"I am especially pleased about the timing of this expansion and the location and quality of our new head office facility," said Dr Zbigniew Michalewicz, Chairman of the Board of SolveIT Software. "These new premises will accommodate our growth plans, enhance our operational and research & development capability, and allow us to increase the contribution SolveIT Software makes to a variety of different industries."

Visitors to SolveIT Software's new head office will be pleased to know that it's located 6km from the airport, close to taxi, tram, bus, and train transport, and within walking distance to city accommodation.

Other recent news at SolveIT Software include the winning of \$588k in federal grants for "green" supply chain optimisation, and the signing of several new global customers, including Amcor and Incitec Pivot.

About SolveIT Software Pty Ltd

SolveIT Software Pty Ltd is an Australian company specialising in supply & demand optimisation. Founded upon the leading research of several world-renowned computer scientists and research organisations, we offer enterprise software for advanced planning & scheduling, supply chain network optimisation, demand planning & optimisation, and predictive modelling. Our software applications are based on proprietary platforms for advanced optimisation, prediction, and what-if analysis, and can optimise production and supply chain activities on both a local (plant) and global (network) level. Customers include Rio Tinto, ABB Grain, Visy Industries, Pernod Ricard Pacific, Amcor, Incitec Pivot, ETSA Utilities, ElectraNet, PFD Food Services, Wilson Transformer Company, Dentsu Corporation, and the Australian Defense Science and
