SolveIT Software Signs Contract with NSW Local Government for Advanced Planning & Scheduling (APS) of Equipment and Resources

ADELAIDE, SOUTH AUSTRALIA, 27 April 2010 – SolveIT Software Pty Ltd, a leading provider of enterprise software for supply & demand optimisation and predictive modelling, announced today that it has signed a contract with Wyong Shire Council in New South Wales for the deployment of SolveIT Software's Advanced Planning & Scheduling (APS) system for government-wide equipment and resource scheduling.

Wyong Shire Council currently schedules equipment and operators to perform council works in the Wyong Shire area through a manual, spreadsheet-based process. Given the constraints around which operators and equipment can perform the task and their availability, this is a time-consuming and error-prone process for the Wyong planners. The deployment of SolveIT Software's Advanced Planning & Scheduling (APS) system will simplify and automate this process by managing bookings and confirmation workflow, providing visibility of information to schedulers, and significantly reducing the time required to produce schedules.

"SolveIT Software's APS system will provide Wyong planners with an intuitive interface for complex scheduling functions, including drag-and-drop assignments on a planning board, workflow management for entering bookings and confirming operators, and easy-to-use re-scheduling functionality," said Dr Arvind Mohais, SolveIT Software's Director of Technical Delivery. "It will provide a complete view of key information required to make proper scheduling decisions, including operator availability, asset and operator utilisation, equipment availability, and confirmed and unconfirmed bookings. The system will be integrated with Wyong's existing ERP and other business applications, and will replace a variety of manual processes and spreadsheets."

Wyong Shire is located in the Central Coast region of New South Wales, Australia, north of Sydney. It includes a coastal strip from Bateau Bay to Budgewoi, some lakeside towns and residential areas, some inland towns on the coastal plain and a sparsely populated region to the west with some rural townships (Yarramalong, Dooralong, Jiliby) and regions of native bush (Kulnura). For financial year 2007 - 2008, Wyong Shire Council had revenues in excess of \$244 million. For more information about Wyong Shire Council, please visit www.wyong.nsw.gov.au

About SolveIT Software Pty Ltd

SolveIT Software Pty Ltd is an Australian company specialising in supply & demand optimisation. Founded upon the leading research of several world-renowned computer scientists and research organisations, we offer enterprise software for advanced planning & scheduling, supply chain network optimisation, demand planning & optimisation, and predictive modelling. Our software applications are based on proprietary platforms for advanced optimisation, prediction, and what-if analysis, and can optimise production and supply chain activities on both a local (plant) and global (network) level. Customers include Rio Tinto, ABB Grain, Visy Industries, Pernod Ricard Pacific, Amcor, Incitec Pivot, ETSA Utilities, ElectraNet, Foster's Group, BMA Coal, PFD Food Services, Wilson Transformer Company, Dentsu Corporation, and the Australian Defense Science and Technology Organisation (DSTO). For more information about SolveIT Software, please visit www.SolveITSoftware.com
