SolveIT Software sponsors Business Improvement in Mining Conference

ADELAIDE, SOUTH AUSTRALIA, 26 July 2011 – SolveIT Software Pty Ltd, a leading provider of enterprise software for supply & demand optimisation and predictive modelling, announced today that it will be sponsoring the upcoming Business Improvement in Mining Conference to be held in Brisbane on the 25th and 26th of October.

This event, will focus on cutting edge case studies on where and how mining operations are making improvements to their efficiency; lean tools and methodologies to identify inefficient practices and processes; six sigma strategies and tips to highlight the causes of process variability; and change management solutions for getting buy in from both senior management and front line workers.

“Australian mining is going through an unprecedented boom, with high prices fuelled by the demand for commodities in Asia's growing economies,” said Ross Clayton, event organiser and Director of Business Improvement in Mining Director from Mining IQ, a division of IQPC. “Business improvement offers mining companies the opportunity to maximise the current high commodity prices by enabling them to increase throughput and grade quality by identifying bottlenecks and reducing their process variability.”

“SolveIT Software is engaged in industry-leading implementations of solutions focussed on unifying planning and scheduling requirements across operational and functional silos in some of the world's leading mining organisations. Our experience with these customers continually reinforces the importance of combining process change and supporting technology to facilitate improved business visibility and decision making in complex operational environments,” said James Balzary, Director of Resources for SolveIT Software. “This event is the ideal combination of real-world case study presentation by industry leading business improvement practitioners and thought leadership education from globally recognised and research backed companies such as SolveIT Software”.

About IQPC

For over thirty years, IQPC has helped the world's leading corporations solve their business challenges through the sharing of practical industry solutions and global best practice. In the process, the company has built a formidable reputation for quality and value. The world's most progressive companies have benefited from IQPC's unrivalled global reach, which has connected international expertise with regional and local leaders.
